Description

Sabre 426 built and launched 2006 is now for sale exclusively with DBY Boat Sales.

The Sabre 426 is a medium displacement cruiser/racer design offering the performance of a lighter racing boat but with considerably greater cruising amenities. This combination of traditional styling and great performance is what has built Sabre Yacht's reputation since its first model was launched in 1970. A very fair comparison to Hallberg-Rassy, Oyster, Moody and Hylas yachts.

Sabre's attention to detail is well known. Whether it be the style and grace of a sheer, the intricate details of a deck mould blending comfort, safety and good looks, or the details found in the hand crafted interior joinery, Sabre Yachts has achieved a stellar reputation for quality and luxury.

The interior layout of the Sabre 426 offers a full beam salon with seating for all crew and guests. Storage is abundant. A very private master cabin with en-suite head and shower stall is located in the bow, and the guest cabin with queen sized berth is found below the cockpit. A full sized chart table is placed at the base of the companionway steps, opposite a full U-shaped galley.

The Sabre 426 is a sailor's sailing yacht, as comfortable on an overnight with friends as on a long offshore passage.

Features

| | |
|------------------------------|--|
| Designer | Jim Taylor |
| Builder | Sabre Yachts |
| Water (Potable) Capacity (l) | 550 |
| Hull Construction Material | Single unit, vacuum bagged fiberglass of alternate layers of mat knitted biaxial roving. Cored with Airex PVC closed cell foam. ISO NPG gelcoat. Below waterline chopped strand glass with vinylester resin are used as a back up for ISO NPG gelcoat. Internal deck to hull joint. Double boot and cove stripes. Bulkheads, berth faces, shelves and floor stringers laminated to hull providing integral, structural strength. |
| Hull Type | Mono |
| Deck Construction Material | Single unit, resin infused fiberglass with Airex core for stiffness with high density PVC core in high stress areas. The deck is fastened to the hull using stainless steel thru bolts every 6" (4" in way of genoa tracks) 3M 5200 Polyurethane sealant used in the hull/deck joint. |
| Country Origin | USA |
